

A Illuminated Magnifier specializing in magnifiers has created a serious product.

LED Folding mobile Loupe

With AR coated lens

Battery rechargeable type
Lights on for **5** hours straight

- ✓ Can be used in a variety of locations
- ✓ Free range of motion for various uses
- ✓ Battery powered, no cords in the way.

Continuous lighting is an approximate value measured at maximum illuminance.

LED Folding mobile Loupe

β-Rigel

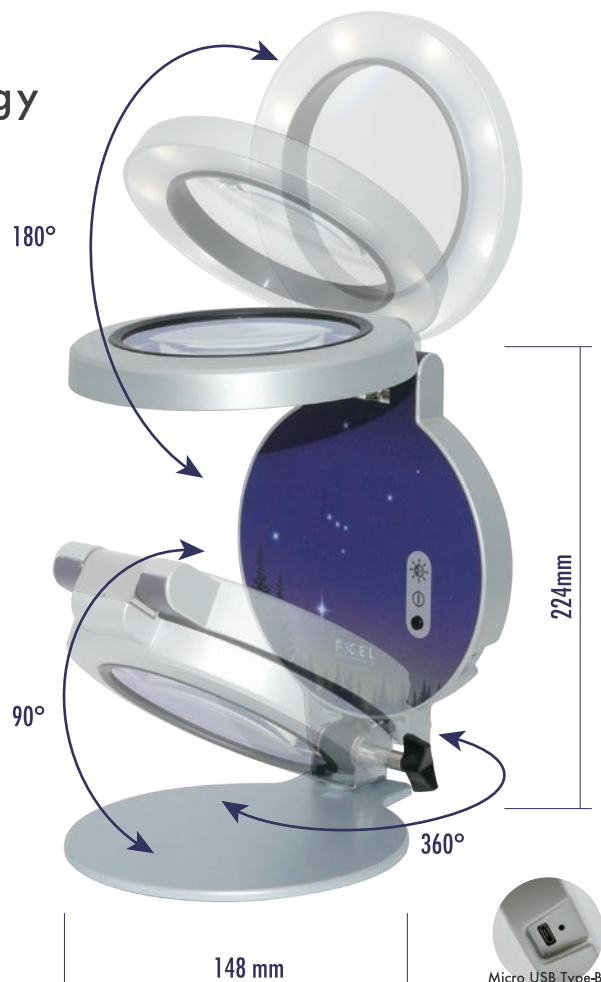

Feature

Specialized manufacturer technology

This product was designed and developed by Otsuka Optics, a well-known specialist in magnifiers, incorporating a wealth of know-how cultivated over many years. The lens is made of glass and coated with AR (anti-reflection) to provide a bright and wide field of view. 1.8x magnification minimizes misalignment and distortion characteristic of lenses, making it very easy to see. The battery-powered design eliminates the cumbersome restrictions of AC cords, making it suitable for use in any location. Please feel the one-rank superior loupe that only a specialized manufacturer can provide.

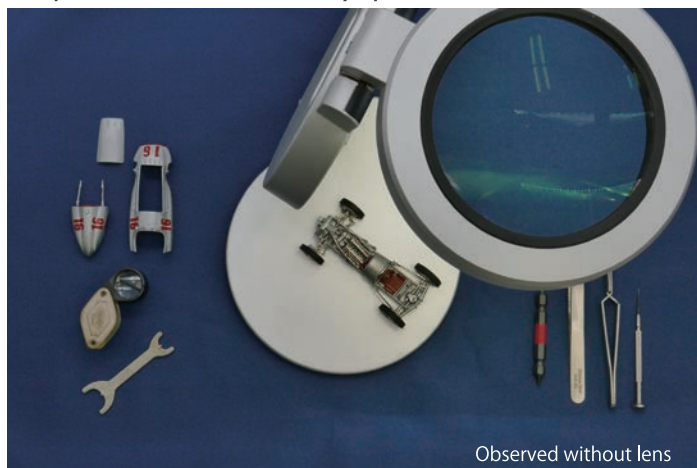

Compact and foldable

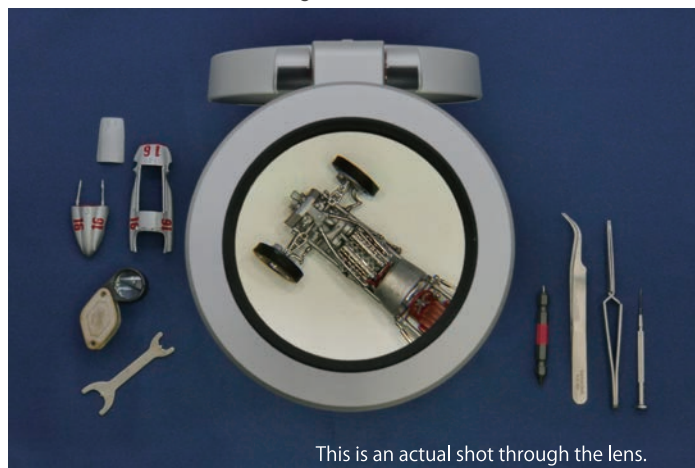

Freedom in a wide operating range

The power of lenses handled by specialized manufacturers!

Observed without lens

AR (Anti-Reflection) coating for 1.8x less distortion

This is an actual shot through the lens.

Visibility depends on distance and angle.

Main Specifications

Lens:Optical glass lens with AR coating on both sides/Lens magnification:1.8X/Effective lens diameter:101 mm /Light source:LED/Color rendering:Ra90/Illuminance:2510Lx=80mm,1780Lx=140mm,1360Lx=70mm/Illumination control:100% ~ 0.3%/Power supply method:DC5V (USB) ,Charging method/Continuous Lighting Time:Approx 5h,illumination Max/Rechargeable battery:NiMH battery/USB charging connector:Micro-B/Operating temperature:5°C ~ 40°C/IP Number:IP30 indoor use only/Body color:silver/Material:ABS resin, glass, steel, etc./Charging cable:USB⇒ micro-B length : 1 m/Weight:approx. 2.5kg/Standard accessories:USB⇒micro-B cable storage bag
