A Brand-New DESKLIGHT

For LED work and inspection lighting
MODELIGHT

ML230F

If you attach an auxiliary lens, it becomes a magnifying glass!

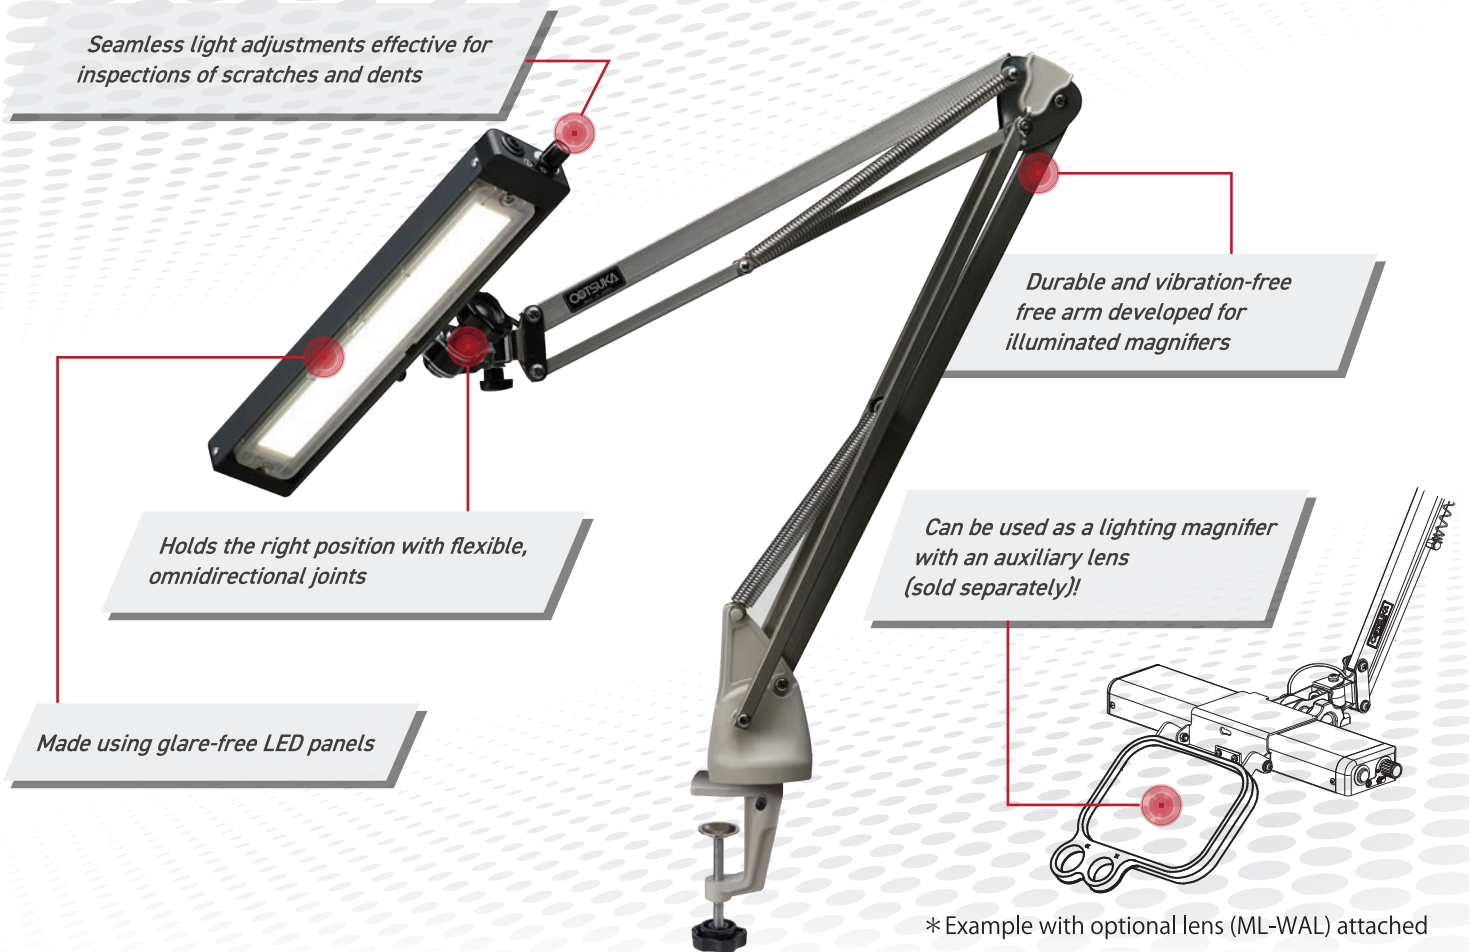

Are you satisfied with your current work lighting?

- Do you want more flexible positioning angles?
- Do reflections and glare cause you problems?
- Are you concerned about the strength of the lamp arm?

If any of the above applies to you,
it's time to consider the MODELIGHT ML230F.

product feature

product specification

Body Dimensions 	Product name	ML230F
	Lamp	White LED light panel
	Illuminance Dimming Function	Yes (10~100%)
	Illumination Directly Under Center	1700 LX / 300 mm , 670 LX / 500 mm
	Illuminance Directly Under Center	146 LX / 300 mm , 57 LX / 500 mm
	Color Temperature	4700K
	Light Emitting Area	230 × 28
	Power Supply Voltage	AC100V 50Hz/60Hz AC adapter method
	Rated Power Consumption	9.5W

(Unit : mm)

optional specification

* 	Product Name : Work Aid Lens, Model : ML-WAL The ML230 can also serve as an illuminated magnifier, making it ideal for precise work and inspections where the naked eye struggles. It allows the angle between the object to be observed and the illumination to be freely changed. This model combines a highly-transparent ultra-wide lens of approximately 2x magnification with high-magnification lenses of 4x and 7x. Effective lens diameter : 142 X 106 , Φ30 , φ25
-------	--

	Product Name : Offset Lamp This product is designed for use where the mounting position is limited by the standard clamp. It offers an option to offset the main unit by approximately 110 millimeters for cases where there is limited space to set up a conventional lamp and to clamp the main unit more securely. It is ideal for installing on workbenches next to walls or on the opposite side of workbenches.
